

ALMOND 20TH CENTURY CLUB LIBRARY &
PFEIFFER NATURE CENTER PRESENT.....

The Incredible Journey of Water

Saturday, August 14, 2010
10:30–11:30 AM

Water is our most important resource.
Today's children will become tomorrows
stewards of this precious commodity and we
believe they are not too young to learn about
and appreciate all that
water offers to life on our
wonderful blue planet.

Learn about the water cycle through the award
winning learning game “The Incredible Journey”,
explore the water sources right in our own backyard,
discuss the importance of clean water, and as water
scientists, see what critters live in the water and their
significance in identifying clean water sources.

You can expect interactive games, lively conversation, and hands-on
exploration of local creek life.
